Not available		1 school year	340

(2) Application Procedure

① Embassy Recommendation (Application through Japanese embassies)

Recruiting covers all scholarship categories. However, because recruiting targets will differ by country and region, potential applicants should check closely with the Japanese embassy in their own specific country or region.

The initial screening is comprised of a document inspection, a written test and an interview. Subjects of the written test vary somewhat by country and region, but generally consist of the following.

Category	Test
Research Students	Japanese, English
Teacher Training Students	Japanese, English
Specialized Training College Students	Mathematics, English, Japanese
Undergraduate Students	Japanese, English, Mathematics or Science (two subjects from Chemistry, Physics and Biology)
College of Technology Students	Mathematics, Physics or Chemistry, Japanese, English
Japanese Studies Students	Japanese

The local Japanese embassies conduct their screening on the basis of these test results, and then make their recommendations to MEXT. MEXT confers with the selection committee, deliberates with the host schools, and then makes its final selections. While candidates may express their preferences for specific schools of study, the final decision will be made by MEXT.

For further details, candidates should contact the Japanese embassy in their own specific country or region.

② Application through Japanese Universities

-1 University Recommendation (selection of new applicants before they arrive in Japan)

Based on the university exchange agreement, Japanese universities conduct their examinations of the international student candidates, with recommendations made to MEXT as research students or Japanese studies students. MEXT confers with the

selection committee, and then makes its selections. For further details, candidates should contact their current school of enrollment.

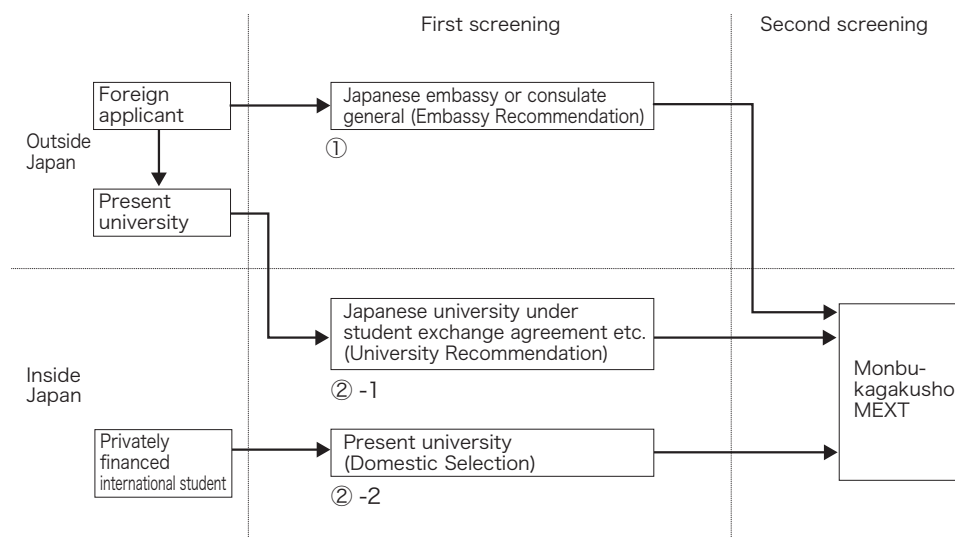

-2 Domestic Selection (selection of privately financed students already in Japan)

Targeted under this category are privately financed students currently studying at Japanese universities. Qualified are third-year undergraduates expected to advance to fourth-year regular student status (sixth-year status in the case of medical, dental or veterinary students or those majoring in 6-year system pharmaceutical sciences), fourth-year students expected to advance to regular Master's program student status, or Master's or Doctoral students expected to remain as regular students for one year or longer. Applicants with excellent academic records are chosen to attend from the new school year as undergraduate or research students.

For further details, candidates should contact their current school of enrollment.

Applicants must pass this first stage and then a second stage of screening by MEXT (document screening) before a final decision is made.

The general flow of an application is as follows.

For Young Leaders Program, the recruitment will be conducted through the embassies of Japan in target countries upon the recommendation of recommending authorities. Initial selection will be made through document screening, interviewing, essay writing, etc.. The second selection will be done by YLP Committee set in MEXT, and hence the final decision on candidates.

(3) Recruiting, Arrival in Japan

The recruiting period will differ by country and region, although the following timing normally applies.

	Category	Recruiting period	Arrival in Japan (scholarship payment start-up)
Embassy Recommendation	Research Students	Mar.	April or October of following year
	Undergraduate Students		April of following year
	Teacher Training Students	Dec.	October of same year
	College of Technology Students	Mar.	April of following year
	Specialized Training College Students		
	Japanese Studies Students	Dec.	September or October of same year
University Recommendation	Japanese Studies Students	Feb.-Apr.	October of same year
	Research Students		October of same year
Domestic Selection	Research Students	Sep.	April of following year
	Undergraduate Students
